# Dear valued customers,

---

## **Lily worldwide market**

Even with all the alarm bells going off in our industry, the necessary decrease in bulb production for crop 2019 was not reached at all. Only in the LA-hybrid group, the acreage was reduced. Oriental and OT-hybrids production numbers combined, did slightly increase. This has been reflected by lower prices in general for most of the oriental and OT-hybrids all throughout the season. As long as a significant decrease is not achieved, we do not expect an increase in the bulb prices.

After significant issues in the 2017 Lily market due to imprisonment of three large importers in China, both Vietnam and China have finally recovered most of their market segments. The outcome is that a considerable amount of new, smaller importers did start up. In Japan, Australia and Taiwan the consumption of lilies seems to decrease structurally. In the USA mostly in California the growth of marihuana has significantly replaced cut flower production. That in response to the already tough competition provided by cut flowers importers from South America for so many years. Iran was a growing market but currently suffers from UN and US sanctions. Export of bulbs to South Korea remains minimal and challenging. The domestic cut flower market is still not developing in this populated country, also the phytosanitary regulations make export of lilies to South Korea very risky. The number two populated country in the world, India with 1,3 billion habitants has not developed yet into a serious lily market for unclear reasons. But due to the rapid economic development in the last few years and the obvious growth of the middleclass, we think India has tremendous potential.

## **Calla**

Zabo Plant started in 2019 with the supply of Zantedeschia tubers. The bulbs we shipped in our first season have been received in very good condition by our customers. We have invested considerably both in storage facilities and in experienced staff for both for the potted and cut flower Calla markets. We are dedicated in becoming a serious player in the calla bulb supply. The substantial increase in bulb production for this 2019-2020 crop season does worry us a bit in view of the still relatively small market. Calla is a sensitive product and so for the bulb growers, potted and cut flower growers it requires their superior attention.

## **Chile**

In addition to our current Chilean production at Valdivia Lilies, we proudly announce that a new contract growing company 'Andes Bulbs' has recently been started in Chile. This bulb production company is started in a great working cooperative effort together with Van Den Bos Flowerbulbs.

## **RoseLily**

Most of the recent varieties of RoseLily performed very well. These varieties get more mature and the knowledge of the bulb growers about the assortment is increasing simultaneously. The pollen-free double oriental lilies find their way all over the world and us getting feedback from the cut flower growers remains essential in order to decide together with the bulb growers what varieties to increase, decrease or discontinue. We are very excited not only about the current varieties but the new variety selections also which have been selected through the years and will be introduced in the next period. This will include some promising shorter varieties for potted plant producers as well.

## **LilyLooks – Pot liliium**

We are very excited about our LilyLooks pot liliium program. This year, we will introduce several new genetic short LA-hybrids to the market. The Summer-series! These varieties are specially selected for (outside) pot plant production and grow very solid in warmer climate conditions. We are also looking forward to the market introduction of Longiflorum hybrid 'Miracle'. A great item for the Easter holiday market in the USA.

We would like to thank you very much for your continued business.  
On behalf of the complete Zabo Plant team,

Jacob, Frits and Kees.

## **Arvandrud<sup>®</sup>** **OT-hybrid**

Arvandrud shows very large buds and flowers. In warm climates, Arvandrud can be side facing.

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-4	2-5	3-6	4-6	95	120

## **Bacardi<sup>®</sup>** **Oriental**

Bacardi is not that new anymore but especially the appealing flower color is still getting more popular around the world.

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-3	2-4	3-6	4-6	120	95

## **Balzana<sup>®</sup>** **Oriental**

*The flower color of Balzana is eye-catching. We need some more commercial trials before giving a decent conclusion.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-3	3-5	4-6	5-7	105	105

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-3	2-4	3-5	4-6	105	95

## **Benson<sup>®</sup>** **Oriental**

*Benson was striking to us as a 'workhorse' variety. Very compact plant and well coloured buds.*

## **Buriano**<sup>®</sup> **Oriental**

*A relative new interesting breeding selection. Pure white, large flowers with thick petals. Amazing results in the initial vase-life trials.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-3	2-4	3-5	4-6	90	120

## **Carbonero**<sup>®</sup> **OT-hybrid**

*Especially the color of the buds is striking! Carbonero is also very interesting because of the short production time.*

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-3	2-4	3-5	4-6	90	95

## Castellani® Oriental

Castellani has a specific strong stem. Dark-green leaves and good flower count in smaller size bulbs. A variety within the 'work-horse' category.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	115	120

## Catone® Oriental

Catone is a light pink oriental which grows very good in warm conditions.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	4-7	115	110

## **Companion<sup>®</sup>** **Oriental**

*Companion is exceptional because of the short production time, the first flowering oriental. Good budcount, stem can be short in warm periods of the year.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-7	5-8	85	85

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
3-4	3-5	4-6	5-7	90	120

## **Constable<sup>®</sup>** **LA-hybrid**

*A typical "production-lily". Just a reliable variety with a consistent budcount.*

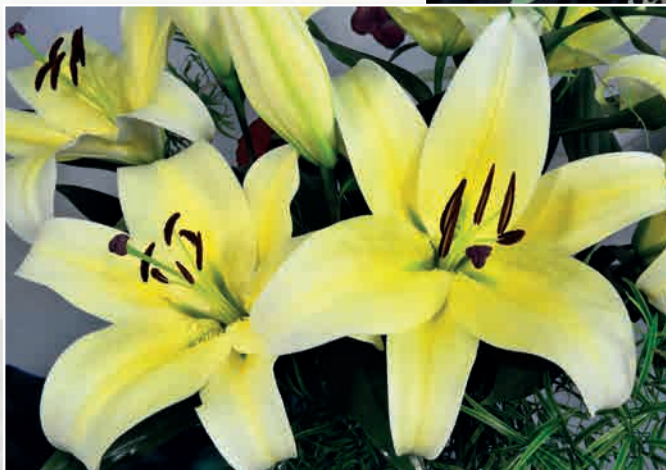

## Dalian® OT-hybrid

Dalian is getting more and more popular in many countries around the world. The power of Dalian looks to be the uniformity of the plants.

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-3	3-5	4-5	5-7	95	125

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-4	3-5	4-6	5-7	95	120

## Felino® OT-hybrid

Felino has an impressive presentation. A very strong stem and upward facing, large flowers. The color comes really close to "good old Conca Dor".

## **Ferrero®** Oriental

*One of the most promising new varieties in our assortment. Ferrero shows full color on the buds before opening. Tall, strong stems and a short growing period.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-4	4-5	4-6	95	115

## **Firebolt®** Oriental

*The darkest colored oriental ever! The quantity of buds is very good and flower size is large as well. Firebolt is becoming a true champion.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	110	85

## Gizmo®

### LO-hybrid

Gizmo is a cross between a Longiflorum and Oriental. The flower color is pure white (from Longiflorum type) and the flower is like a large oriental flower which makes this variety very unique.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
1-2	2-3	2-4	3-5	95	120

## Homerus®

### Oriental

The buds of Homerus are close together, what creates a great looking bunch. Large flowers and an appealing strong-pink color.

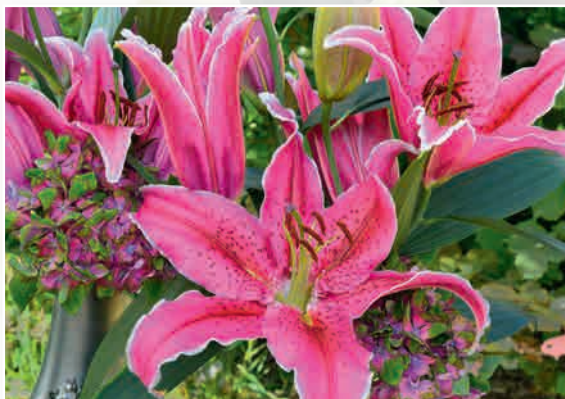

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	2-4	3-5	4-6	105	110

## ***Jewel Star***<sup>®</sup> ***Oriental***

*Jewel Star is a new breeding selection and might be interesting within the Starfighter market.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-8	110	110

## ***Kaveri***<sup>®</sup> ***Oriental Hybrid***

*A very unique variety! We are looking forward to supply OA-hybrid Kaveri as a novelty to any lily program.*

Quantity of flowers per different bulbsize				Finish Time	Height
10-12	12-14	14-16	16-18	(days)	(cm)
3-5	4-6	5-8	6-9	85	90

## Lodi® Oriental

Strong stems, always up facing, large buds and a great flower color in multiple running program all over the world. Lodi has tall stems and seems to have the optimal performance within the warmest periods of the year.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	110	115

## Marengo® OT-hybrid

Marengo shows a great potential because of the appealing flower color and well colored buds before opening.

Quantity of flowers per different bulbsize				Finish Time	Height
14-16	16-18	18-20	20-22	(days)	(cm)
2-3	2-4	3-5	4-6	90	100

## **Merapi®** **Oriental**

*A variety with a shining 'hot' pink color. Merapi can grow a bit tall under low light conditions.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	3-4	4-6	5-7	115	120

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	2-4	3-5	4-6	110	110

## **Monferrato®** **Oriental**

*We are looking forward for more commercial trials with Monferrato.*

## Ovada<sup>®</sup> Oriental

*Ovada has a characteristic thick and very strong stem. A very attractive soft-pink flower color.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	2-4	3-5	4-6	110	125

## Paposo<sup>®</sup> Oriental

*A relative new interesting breeding selection. Pure white, large flowers with thick petals. Surprising results in the initial vase-life trials*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-3	2-4	3-5	4-6	90	120

## **Peter Schenk<sup>®</sup>** **Oriental**

*A variety with a very compact shape of the buds. The color of Peter Schenk is very much 'eye-catching'.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	3-5	4-6	5-7	125	125

## **Piceno<sup>®</sup>** **Oriental**

*The flower color of Piceno is striking. We need some more commercial trials before giving a decent conclusion.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	2-4	3-5	4-6	115	110

## Silverside® Oriental

One of the most appealing varieties with very large and attractive coloured buds.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
n/a	3-4	4-5	5-6	110	110

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	110	110

## Siponto® Oriental

Siponto shows a very nice budcount. In the greenhouse this variety needs some space to avoid weak stems.

## Sisto® Oriental

*Sisto has a reliable budcount from  
bulb size 14-16 onwards. Large, well colored  
buds before opening.*

Quantity of flowers per different bulb size				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-3	3-5	4-6	5-7	105	105

Quantity of flowers per different bulb size				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	85	110

## Surfside® LA-hybrid

*Surfside was selected as one of the  
first dark orange LA-hybrids. Surfside  
performs best in the warmer periods of  
the year.*

## Swansea® LA-hybrid

Swansea is popular in many countries because it's such a reliable variety. Without the risk of top flowering, it is a great winter producer.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	95	120

## Tampa® LA-hybrid

Tampa was selected on excellent post-harvest results. Flower buds are nicely in top' of the stem.

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	85	120

## **Tebaldi®**

**Asiatic**

*Good bud count, nice deep-orange color, strong stems and one of the fastest producing Asiatics. Tebaldi is ready for the battle with Tresor and Brunello!*

Quantity of flowers per different bulbsize				Finish Time	Height
10-12	12-14	14-16	16-18	(days)	(cm)
2-4	3-5	4-6	5-8	70	90

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	90	120

## **Toscanini®**

**LA-hybrid**

*Toscanini shows pure white flowers. It might be interesting to test side by side with "good old Litouwen".*

## Trebbiano®

**LA-hybrid**

*This easy growing, great bunch-maker variety is very popular all over the world. An overall very consistent performance.*

*The bloom color is like green grapes 'green-cream-white' an excellent color to create the more cool floral design looks with.*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
3-4	3-5	4-7	6-8	90	110

## Vendome®

**Oriental**

*A very compact, upfacing, strong-pink variety without pollen!*

Quantity of flowers per different bulbsize				Finish Time	Height
12-14	14-16	16-18	18-20	(days)	(cm)
2-4	3-5	4-6	5-7	115	120

# *Bloems LA-hybrids - Color the world!*

---

Bloems is a cooperation between 8 large lily bulb growers, focused on the production of mainly LA-hybrid varieties. Varieties like "Nashville", "Litouwen" and "Eremo" took their worldwide market share the last years.

Within "Bloems innovation", growers work closely together with breeding companies and bulb distributors, focused on testing and the final market introduction of new varieties. This year, new selections like 'Sunderland' and 'Menton' will be tested. 'Logan', 'Burlington' and 'Rodengo' will be introduced in commercial quantities.

## Introduction

The Roselily Series is an exciting new line of 'pollen-free' double flowering Oriental liliiums.

These Lilies were developed by "De Looff" Lily Breeding & Innovation Company started in 1993.

It has always been the desire in the lily industry to have double flowering liliiums that would stand up commercially as a cut flower against the wide selection of varieties that are currently in the market. Several semi-double varieties have made it to the market, but having a hard time holding up to the high standards that are expected from the worldwide liliium industry. It is with excitement to confirm that the Roselily series do perform at this level.

Each variety has been carefully selected and tested for its viability in both the bulb and flower production, as well as in the post-harvest stage. A full scale bulb production was setup through a ten-member grower association in the Netherlands that have one objective which is: to bring high quality Roselily flower bulbs to the market.

## Roselily as Pot-plant.

Next what we see coming down the pipe-line are some genetically short varieties which will be great for landscape, patio & holiday pot production.

## Future

Besides the Dutch crop bulb production, the next step will be to produce an assortment of selected varieties in Chile. We are looking forward to supply year-round bulb availability.

For the cut flower growers & florists, the Roselily has great potential. With a long vase life, it's pleasant fragrance & absence of pollen, the Roselily is a fantastic flower to create mix bouquets, large arrangements, cordages & boutiniers.

## *“Lily Looks’ Pot lilies*

---

*LILY*  
*LOOKS*

- **Reliable in production**
- **High bud count**
- **Fast crop**
- **Genetic Short**
- **Longer shelf life**

### **Miracle:**

A real breakthrough in lily breeding! ‘Miracle’ is one of the first genetic short pot-longiflorum varieties. We have done some extensive trials under different circumstances to find out the best growing recommendations.

### **Dwarf LA-hybrids, the Summer series!**

Another breakthrough within the LilyLooks breeding line: Genetic short LA hybrids. These new selections are especially tested to be an additional value in the warmer climates. Great plants with nice foliage volume, very large flowers in a wide and bright color range.

### **Asiatics:**

LilyLooks is a unique line of Asiatic lilies for pots. In each color group, there are several varieties available which makes it possible to supply a uniform, full color range of pot Asiatic lilies anywhere around the world, for a year-round production. With the solid colored ‘Tiny Series’ the assortment and availability is excellent.

Since the breeding program is continuing successfully, only the best varieties within the line survive. A few varieties are replaced and improved varieties like Tiny Comfort, Tiny Heroes, Tiny Ranger and Tiny Crystal have become available.

Tiny Double You is the first genetic short double-flowering Asiatic hybrid, a very unique and great performing variety, available in good volume and great quality.

### **Oriental:**

Within the white, pink and dark pink colors, the Sunny-series proved their characteristics. This year, we are more than happy to test and introduce new selections like Sunny Camino, Sunny Benito and Sunny Tonga. The plants are genetically short and strong performers.

There is availability from Southern Hemisphere from our Valdivia Chile bulb production farm which will make it possible to grow the best quality pot lilies even in the winter months when we have the lowest light levels. With SH-bulbs, a premium quality pot oriental lily becomes a reality for important holiday crop markets like Valentine’s Day, Easter and Mother’s Day.

If you are looking for a specific floriculture potted crop, LilyLooks pot lilies are your best option to get a beautiful looking crop market ready in 60-days to 100-days depending if you use the Tiny Asiatic lilies or the Sunny Orientals lily bulbs.

## Expert in Flowering

Zabo Plant is proud to present the CallaNova label, a new and proven range of calla lilies that was developed in collaboration with the world's best growers of calla lily bulbs. Combining knowledge and experience, a high standard of quality and special product preparation with a strong network and reliable logistics, we are an expert in flowering. This makes Zabo Plant your ideal partner in calla lilies.

### CallaNova

- Supreme Callas
- Dedicated Team
- Proven Supplier

Our cut flower calla program are selected varieties that are strong, reliable and have a good flower count.

## *Characteristics*

---

### **Description**

### **Shortname**

Forcing time in days ..... FT

Height of the plant ..... Length

Available from Southern Hemisphere..... SH

### **Please note:**

The results of our testing greenhouse are based on Dutch circumstances and have the purpose to give an indication.

Zabo Plant BV and Zabo Plant Inc. are not liable for the information in this book.

## Dutch Lily Days

---

**In week 23, the same week like the last few years, the horticultural industry is welcome again to visit nurseries, breeders and exporters of lilies.**

**We would like to invite all our valued customers during the Dutch Lily Days from 2 ~ 5 June 2020.**

**During the Dutch Lily Days, we will present novelties which will make the real difference for the coming years within the potlily and cutflower market!**

**Also our Calla label "Callanova" will be presented at the same moment.**

**We very much appreciate if you confirm your visit with us. Just send an email to [info@zaboplant.nl](mailto:info@zaboplant.nl)**

**Visit address:**

**Korte Belkmerweg 1A**

**1756 CB 't Zand**

The page features a background of yellow lilies with green leaves and stems. Overlaid on this background are horizontal lines for writing. The word "Notes:" is written in a bold, italicized font at the top left.
