Dear customers,

We are proud to present you with version 24 of the Zabo Plant Lily Guide! While our new and improved website has a digital copy, we believe that this beautiful reference guide will come in handy when you are not near your screen. Inside, you'll find some interesting new varieties! Your sales representative is ready for any questions you may have.

We call 2023, "The After-C Era." For us, it was a period when our business experienced our first "doom" followed by a "bloom." In many countries, COVID triggered unexpectedly high sales online and in supermarkets which more than compensated for the losses caused by dropped sales in the traditional outlets.

Unfortunately, the challenges didn't end with COVID. The end of 2022 brought extremely high gas prices that caused another setback- especially for some in the Dutch horticultural industry. Things started returning to normal just as Mother Nature revealed her spring plans. Night frost caused serious damage to the crops and will, therefore, lead to some serious challenges in 2023 and 2024. We also experienced this in 2022 at our farm in Chile.

The biggest threat the market is facing is the continuous implementation of stricter environmental regulations. This is challenging our industry to the extreme. We need a stronger lobby to ask for a more realistic approach in combination with a prioritized budget and effort to explore newer ways to deal with our changing environment.

Never ones to look down, we are facing these challenges with a proactive approach! In recognition of aging owners, our company has been focusing on attracting a new generation to secure the continuation of our company. We are pleased to announce that we have been successful in doing so for essential positions in the Netherlands, United States, and Chile. Our Zabo Inc. customers have had their operations taken care of for two years now by Martijn and Rachael. And we know success starts with a good product and expert product knowledge. Therefore, adding Jeroen as our Product Manager was also a logical step.

Thank you for trusting our company to meet your needs for so many years. We also want to thank our suppliers for the quality bulbs we continue to receive. Zabo Plant will continue striving to provide you with the highest service possible. We wish you all the best!

On behalf of the Zabo Plant owners,
Frits, Jacob, Kees, and Guido

Chile Assortment

Welcome to Valdivia Lilies, where the vibrant spirit of Chilean nature meets the artistry of the floral wonder that is Lilies.

Valdivia
LILIES CHILE

Devola®

Nestled in the heart of Southern Chile, our company cultivates and delivers a symphony of colors and innovations, encapsulating the essence of our beloved Valdivia.

Together with Gebr. Vletter & Den Haan, Zabo Plant has established this joint venture company in 2013 by buying the Juan Sone nurseries and facilities, with the promise to provide high quality bulbs year round.

At Valdivia Lilies, we pride ourselves on nurturing lilies that flourish under the southern hemisphere's generous sunlight. Our bulbs, carefully selected from the southern hemisphere, bask in extended daylight hours, resulting in the development of a higher than normal bud count. Each bulb is nurtured by the fertile soils and the embracing sunlight, resulting in nature's finest product.

As you leaf through this booklet, let the stories of our lilies unfold, each one a testament to our passion and commitment to harnessing the unique energy of the southern hemisphere. Join us on this floral journey and bring a piece of Valdivia's elegance into your world.

Introducing Lily Looks Pot Lilies

Lily Looks, the premium potlily brand, offers a range of outstanding features:

- Longer shelf life
- Genetic short stature
- Reliable in production
- High bud count
- Fast crop growth

After extensive testing and selection, Lily Looks brings top-quality lily varieties to the market, including:

1. Tiny series (Asiatics)
2. Sunny series (Orientals)
3. Summer series (LA hybrid)
4. Miracle (Longiflorum)

In the coming years, Lily Looks plans to introduce more LA, LO, Oriental, and OT varieties to the market.

The Summer Series: LA-Hybrids for Pot Growing

A notable addition to the Lily Looks breeding line is the Genetic short LA hybrids. These selections thrive in warmer climates, featuring lush foliage and large, vibrant flowers in a wide range of colors. The Summer series is known for:

- Heat resilient
- Easier to grow
- Giant flowers
- Bright colors
- Natural compactness

Asiatic Lilies: The Tiny Series

Lily Looks offers a unique line of Asiatic lilies for pots, available in various color groups. This allows for a year-round supply of uniform, colorful pot Asiatic lilies worldwide. Notable varieties include Tiny Comfort, Tiny Heroes, Tiny Ranger, and Tiny Crystal. A standout is Tiny Double You, the first genetic short double-flowering Asiatic hybrid.

However, in response to evolving growing conditions and to ensure the best performance for our valued customers, Lily Looks is gradually transitioning to LA varieties. LA hybrids have proven to thrive even in a broader range of climates and offer easier cultivation. This shift will not only enhance the reliability of our

product but also ensure the continued availability of stunning pot lilies for all our growers.

We are committed to delivering the highest quality lilies, and this strategic shift to LA varieties is a testament to our dedication to meeting the changing needs of the floral industry. Rest assured, we will continue to provide exceptional pot lilies while embracing innovations that benefit both growers and enthusiasts.

Orientals: The Sunny Series

Within white, pink, and dark pink colors, the Sunny series shines with its genetically short and robust performers like Sunny Camino and Sunny Benito. These lilies can be grown year-round, even in low-light conditions, thanks to bulb production in Valdivia, Chile.

Year-Round Pot Lily Cultivation

Lily Looks pot lilies can be grown year-round, globally, offering a full-color range. They are versatile for indoor and outdoor use, as pot plants or bedding and patio plants, and can even be used as perennials in gardens.

Key Benefits of Lily Looks Pot Lilies:

- Abundant buds
- Minimal leaf yellowing
- No bud drying
- Long-lasting, beautiful blooms
- Compact growth
- Easy cultivation
- Extensive shelf-life testing
- Green foliage from top to bottom

Lily Looks pot lilies are the perfect choice for cultivating stunning, market-ready crops in 60 to 100 days, depending on the variety.

Roselily

Double flowering, long lasting, and lightly scented lilies that resemble roses

Introduction

The Roselily Series is an exciting and proven line of 'pollen-free' double flowering Oriental liliiums. These Lilies were developed by "De Loeff" Lily Breeding & Innovation Company started in 1993.

It has always been the desire in the lily industry to have double flowering liliums that would stand up commercially as a cut flower against the wide selection of varieties that are currently in the market. Several semi-double varieties have made it to the market, but having a hard time holding up to the high standards that are expected from the worldwide liliium industry. It is with excitement to confirm that the Roselily series do perform at this level.

Each variety has been carefully selected and tested for its viability in both the bulb and flower production, as well as in the post-harvest stage. A full scale bulb production was setup through a ten-member grower association in the Netherlands that have one objective which is: to bring high quality Roselily flower bulbs to the market.

Roselily as Pot-plant.

Next what we see coming down the pipe-line are some genetically short varieties which will be great for landscape, patio & holiday pot production.

Future

Besides the Dutch crop bulb production, the next step will be to produce an assortment of selected varieties in Chile. We are looking forward to supply year-round bulb availability.

For the cut flower growers & florists, the Roselily has great potential. With a long vase life, it's pleasant fragrance & absence of pollen, the Roselily is a fantastic flower to create mix bouquets, large arrangements, cordages & boutiniers.

Bloems LA-hybrids

Color the world!

BLOEMLILY

High customer focus and an efficient small organization have brought Bloems to a leading position in the sales of LA-hybrid varieties. Thanks to an independent position in the market and a minimal overhead Bloems has been able to focus strongly on what is important: to develop meaningful long term relation and partnerships

Founded more than 10 years ago as a cooperative by eight large Dutch lily bulb growers, Bloems has proven to be innovative and has provided LA-hybrid varieties such as Litouwen and Sunderland. Customers value us as a very helpful alternative to the classical intermediary organisations in the market. In 2019 Bloems and Mak Breeding decided to join in a formal partnership. Mak Breeding has developed an extensive number of TA-hybrids and OT-hybrids and is constantly searching for improvement of resistance and plant characteristics. Bloems has contracted a number of exclusive exporting companies, among which Zabo, to market these new varieties. This customer focused alliance between breeder, growers and exporting companies creates unique opportunities in developing and selecting the best TA- and OT-lilies. Bloems and Mak market TA & OT varieties under its well received range of Bloemlily branded products.

CALLA nova

When Calla specialists from the former Sande company joined Zabo Plant in 2018, we confidently added Callas as a high value, quality crop to our portfolio. By doing so, we granted our customers access to a rich network of contacts throughout the entire chain- from breeding to sales. Our branches in Chile and the United States offer outstanding opportunities for the sales and distribution of our products.

Quality is guaranteed because we only form partnerships with the very best in the field and translate our knowledge and expertise into a high level of service.

This makes Zabo Plant your ideal partner in Calla Lilies
